A fancy set of Baldy heifers like these don't come to town very often. We want to showcase the power of the Hereford - Angus cross. They were all AI'd and cleaned up with a calving ease Angus Bull from Minert-Simonson Angus Ranch. They are due to calve in late March early April. Don't miss this set of moderate framed heifers.

This pen is a match to my last year's cow calf pairs at the Classic. All these heifers were sired by Spencer Herefords' HH Advance and out of some outstanding Angus cows. They were all bred to Freds Black Profit 5807, a son of Freds Profit Line, who both come from Fred Ranch in Rose, NE. The work will be done for you here! Don't miss these cow/calf pairs in the Classic Pen of 5 sale! These fancy commercial baldies will have calves at side come sale time.

This group of heifers were selected early in the game with the intention of going to the Cattlemen's Classic. They are maternal bred AI'd back to bulls that have been making a statement in the industry. These heifers are the right kind and should work in any diversified cattle herd.

These heifers are easy to work. When you drive into the pasture, they will come to show themselves off. They were pasture exposed on 05/28/2008. The two bulls both have low birth weights and have been used before with great results! They are both very maternal and also will add pounds to their calves. With the size of these heifers and the low birthweight of the bulls, you should have no problem calving. All shots required by the Nebraska Cattlemen's Classic have been given. You won't be disappointed. Come see us at the Classic in February!

This is a nice set of moderate Meyer influenced heifers. They have not been pushed hard and will be ready to make it on their own. The clean up bull is a Spur Emelous son, which is Griz's grandsire, and is out of Krugerand daughter. I have never touched a calf out of this bull. You can see pictures of these excellent heifers at our website. www.hollenbeckfarms.com
